

836 TACTICAL PHONES™
GIVE YOUR OFFICERS THE TACTICAL ADVANTAGE

836 TACTICAL PHONES™
GIVE YOUR OFFICERS THE TACTICAL ADVANTAGE

836 Technologies is proud to offer a premier video phone that integrates rugged military grade equipment with state-of-the-art technology. Our system will give your tactical team exceptionally clear color video feeds from five cameras simultaneously. Your negotiators will benefit from the crystal clear audio while negotiating and the highly sensitive covert microphone to detect even faint background noises and conversations.

- Easy to Set Up and Operate
- Five High Resolution Color Video Cameras
- Compatible with the CINT Commander
- Ability to View and Record All Cameras Simultaneously
- Introductory Pricing: \$4999 for video, \$3500 for non-video

836 Technologies

For more information call 209-559-8879 or visit www.836technologies.com

If you can't see the patrol car in this picture, neither will they.

NIGHT OPS™

BLACKOUT SYSTEM
(PATENT PENDING)

Our automated system will safely blackout your patrol vehicle's lighting while giving your officers the tactical advantage that they need and reducing the liability commonly associated with blackout systems. Give your Officers the tools they need to be safe and proactive.

836 Technologies

209-559-8879

www.836technologies.com

836 Technologies es una empresa Estadounidense de propiedad y operada por agentes de policía a tiempo completo en California, por lo que tienen conocimiento de primera mano que los productos y características son beneficiosas para la aplicación de la ley.

El ingeniero electrónico de 836 Technologies es un oficial de policía recientemente retirado que pasó los últimos 15 años de su carrera en nuestro equipo de negociación de rehenes.

El CEO actual es un sargento asignado como jefe de equipo en el equipo SWAT. Nuestros productos han sido desarrollados en el contexto de salidas a operativos de llamadas reales.

El CINT COMANDER II es una herramienta de negociación única en su especie que registra y hace un seguimiento de todos los aspectos de una negociación. El sistema acepta teléfonos fijos, teléfonos celulares y teléfonos tácticos. Todo el audio se graba simultáneamente en formato MP3, y se genera un informe como se desarrolla el evento. El sistema se conecta en red con hasta 50 ordenadores, e incluye varias otras características de gestión de incidentes, tales como registros, registros de comunicaciones, archivo / fotos adjuntas, las comunicaciones NOC y audio en directo a todos los ordenadores

conectados en red. El sistema tiene la capacidad de tener dos negociadores, tiene dos unidades Bluetooth integradas, y tiene una entrada de TPI. Un programa de revisión de pruebas integrada que se coloca automáticamente en cada disco de pruebas para facilitar su revisión por el fiscal o autoridad en la terminación de un incidente. El sistema CINT COMANDER II incluye las actualizaciones de software gratuitas de por vida y no necesita derechos de licencia.

En lo que respecta al Teléfono de Video Táctico 836, es la única compañía que ofrece vídeo de color de alta resolución pudiendo alimentar hasta cinco cámaras al mismo tiempo, y puede alcanzar distancias de más de 3000 pies (900 Mts app).

También tenemos la capacidad de proporcionar streaming de vídeo claro de más de una milla (1,5 kms).

En lugar de tener imágenes en blanco y negro o tener que girar a través de la visualización de imágenes de una cámara a la vez, todas las cámaras se pueden observar y registrar al mismo tiempo.

Nuestra consola personalizada DVR / vídeo está programado para registrar todas las cinco cámaras, y tiene tres entradas de vídeo adicionales para la grabación / visualización de otras cámaras como cámaras de seguridad, cámaras ocultas, cámaras robot, etc. La consola de video incluye un disco duro de 1 terabyte y una grabadora de DVD. Viene montado un monitor LCD, y un puerto HDMI que permite conectar el video a un monitor de pantalla grande o un proyector. Nuestro DVR también permite para los teléfonos inteligentes y las tabletas para iniciar sesión en el sistema para ver el video en vivo, grabaciones de reproducción y escuchar el audio desde el micrófono

encubierto.

El teléfono 836 Tactical video incluye un micrófono de alta sensibilidad encubierto que permite a los negociadores detectar claramente los ruidos de fondo tenues y conversaciones. El equipo va a tener la capacidad de utilizar las capacidades de altavoz en el caso de que el sospechoso no va a coger el teléfono. También será

capaz de ver el vídeo en directo desde cualquier ordenador vía satélite. Utilizamos alta resolución .0003 LUX cámaras para el uso en condiciones de poca luz. El teléfono 836 Tactical video tiene la capacidad de aceptar nuestros paquetes con futuras actualizaciones que incluirá sensores químicos, humo y de pólvora, así como una alarma planeada distractora.

También ofrecemos una versión no-vídeo del teléfono 836 táctico que está construido con los mismos materiales robustos como nuestra versión en video.
